

JANGS

Kick-Off Presentation

OUR MISSION

- A web app that bridges the gap between online and physical shopping by connecting users with local stores nearby, helping them find in-stock clothing items quickly.
- Users can search for specific items, compare options from different shops, and visit the store for a seamless and efficient shopping experience.

- Saves time
- Eliminates the need for time-consuming store-hopping
- Provides real-time information on clothing item availability

- Enables convenient online browsing with the option to try on and purchase in-store
- Ensures a more efficient and satisfying shopping experience

THE PROBLEM WE SOLVE

Front-End Dev

PROJECT PLAN

- Platform: Web Application
- Frontend: React.js
- Backend: Node.js
- Database: NoSQL
- Tools: Git Version Control
- Hosting: AWS
- Time-Tracking: Clockify

TIMELINE

OCTOBER

- Project Planning
- Designing
- Requirements Elicitation
- Start Project Doc

NOVEMBER

- Begin Implementation
- Project Status Report
- Business Aspects
- Prototyping

DECEMBER

- Start developing
- Business Pitch
- Prototype Demo

JANUARY-FEBUARY

- Project Development
- Testing

MARCH

- ICT Showroom
- Final Presentation
- Finalize document

THANK YOU!
